Additional information

“Mārpagalmi” is a modern residential project that combines aesthetics, functionality, and a thoughtful approach to residents' quality of life. Here, everyone can find a home that suits their needs – from comfortable and affordable apartments for young families to stylish and well-designed solutions for the city’s dynamic professionals.

The project stands out for its excellent location – just a short distance from Riga’s main transport hubs, public transportation, and business centers, while still offering the advantages of a peaceful and secure living environment. Residents of “Mārpagalmi” can enjoy the convenience of the city without giving up the comfort and harmony typically found in a small town.

Special attention has been given to the layout of the apartments – designed to encourage communication and a sense of community among neighbors, while also ensuring privacy and peace for those who value their personal space.

The apartments in the second building of the project are offered with full interior finishing, with a choice between **Comfort** and **Comfort Plus** classes.

Owners of Comfort class apartments have access to **above-ground parking spaces** located within the project courtyard.

Meanwhile, Comfort Plus apartments come with the option of both **above-ground and underground parking spaces**, as well as the possibility to purchase **storage rooms**.

For more detailed information about the availability of specific apartments, parking spaces, and storage rooms, please contact our sales team – we’ll be happy to help you find the solution that’s right for you.
